

WHAT IS CLAIMED IS:

1. A gaming machine comprising a medal insertion slot having an opening for a player to insert a medal for playing a game, wherein the medal insertion slot comprises a medal guide projection projecting in a forward direction of the gaming machine and configured to guide the medal to the opening,

wherein the medal guide projection comprises:

an inner peripheral part configured to be in contact with outer peripheral surface of the medal; and

a pair of projection parts disposed away from each other and projecting on top of both ends of the inner peripheral part, and

wherein an angle between a ridgeline of one of the projection parts and a horizontal line is configured to be different from an angle between a ridgeline of the other projection part and the horizontal line.

2. The gaming machine as claimed in claim 1, wherein the angle between the ridgeline of one of the projection parts and the horizontal line is larger than the angle between the ridgeline of the other projection part and the horizontal line.

3. The gaming machine as claimed in claim 1, wherein a height of a start point of the ridgeline of one of the projection parts on a side of the opening is configured to be the same as a height of a start point of the ridgeline of the other projection part on the other projection part on a side of the opening.

4. The gaming machine as claimed in claim 1 further comprising a frontward projection portion configured to fix the medal insertion slot,

wherein an angle between an upper face of the frontward
5 projection portion and the horizontal line is configured to be substantially equal to the angle between the ridgeline of the other projection part and the horizontal line.

5. The gaming machine as claimed in claim 1, wherein an angle
between the horizontal line and a line connecting a top of one
10 of the projection parts and a bottom of the one of the projection parts is configured to be smaller than an angle between the horizontal line and a line connecting a top of the other projection part and a bottom of the other projection part.
